

The Asia-Pacific Tele-Ophthalmology Society will embark on a new webinar series focusing on how artificial intelligence transforms clinical practice starting from our September webinar scheduled for next Friday (18th), 21:00 – 22:00 (GMT+8). Chaired by Drs Mingguang He and Paisan Ruamviboonsuk, our next webinar will feature [Emma Beede](#) and [Richa Tiwari](#) from **Google Health**. They will share with us findings in their paper “[A Human-Centered Evaluation of Deep Learning for Diabetic Retinopathy](#).” As a UX researcher, Emma specializes in uncovering insights that inform strategy and inspire exceptional user experiences. Richa is Program Manager with Google Health, working on Healthcare AI in the Asia Pacific region to transform access to and make an impact in healthcare through the application of machine learning products, especially in resource poor settings. Details of the program are given as follows:

- **Theme:** How Artificial Intelligence Transforms Clinical Practice
- **Date:** September 18, 2020 (Friday)
- **Time:** 21:00-22:00 (GMT+8)
- **Chairs:** Mingguang HE & Paisan RUAMVIBOONSUK

Time	Topic	Speaker
21:00-21:02	Welcome by APTOS President	Mingguang HE
21:02-21:05	Introduction of Speakers	Paisan RUAMVIBOONSUK
21:05-21:35	Human-Centered Evaluation of Deep Learning for Diabetic Retinopathy	Emma BEEDE
21:35-22:00	Panel Discussion	Richa TIWARI

[Sign Up Now](#)

We can accommodate as many as 500 participants in our monthly webinars. Free access will be granted on a first come first serve basis the moment you join the webinar. **The 501st attendee will not be allowed into the webinar and will be prompted that the event is full.** The best way not to miss it will be getting ready for the webinar a bit ahead of the scheduled time so that you can be with us once it is broadcast. Please be sure that you do sync your calendar when you sign up to receive meeting reminders. **We look forward to seeing you online.**
